Save a
life!

Please help us purchase an Ultrasound Machine

We need your generosity to raise \$16,000 which the National Knights of Columbus, will match to purchase the \$32,000 ultrasound machine for Care Pregnancy Center in Baton Rouge.

Care Pregnancy Center (CPC) helps a woman receive prenatal care throughout her pregnancy. CPC ranks among the busiest in this country, serving approximately 2,000 women per year. They have 2 older machines, one which will be moved to a clinic in New Orleans. Based on typical success rates at clinics nationwide, we calculate that the machine placed at Care Pregnancy Center and the one moved to New Orleans will save at least 1 baby per week, and possibly more due to the high volume of patients at CPC. The two clinics where we are placing these machines have registered nurses and the training to operate the machines. Neither clinic promotes abortion as an alternative.

In pregnancy clinics, women considering abortion are more than twice as likely to state their intent to carry to full term if they see an ultrasound of their child versus just receiving pro-life materials. Please help save a life by using the envelopes provided in the pews on June 6 & 7 and return on June 13 & 14 at mass.

The Knights of Columbus have a nationwide initiative to support pro-life activities. They have collected \$3 from every member nationwide for their Pro-Life Fund. Please visit www.kofc4030.org or www.st-george.org for more information. This is a collaborative effort with St. George Respect Life Ministry.
